RE: **REQUEST FOR CONFIDENTIAL TREATMENT**
WC Docket No. 14-58 - ETC Annual Reports and Certifications

Request that Information Submitted to the Commission be Withheld from Public Inspection Pursuant to 47 C.F.R. §0.459 and 5 U.S.C. §552(b)(4): Five-Year Service Quality Improvement Plan Progress Report included in FCC Form 481

Confidential Information – Subject to Protective Order Before the Federal Communications Commission

Dear Ms. Dortch:

In accordance with the annual reporting requirements of 47 C.F.R. §§54.313 and 54.422, Wyandotte Telephone Company (the Company), Study Area Code 432034 is submitting a completed FCC Form 481 to the Commission via its Electronic Comment Filing System (ECFS) in WC Docket No. 14-58. *The version of the Company's FCC Form 481 submitted via ECFS is a redacted version of the filing that contains no confidential information.*

The Company, by its authorized representative, hereby requests confidential treatment of two attachments to its FCC Form 481: (1) the five-year service quality improvement plan progress report and (2) the financial annual report, both of which were redacted in the ECFS submission. The request for confidential treatment of the five-year plan progress report is being made pursuant to Section 0.459 of the Commission's rules and Exemption 4 of the Freedom of Information Act (FOIA). The request for confidential treatment of the financial annual report is being made pursuant to the FCC's March 22,

MOSS-ADAMS_{LLP}

Ms. Marlene Dortch

2016 *Protective Order* in WC Docket Nos. 10-90 and 14-58. These attachments contain competitively sensitive data that Wyandotte Telephone Company maintains as confidential and does not normally make available to the public. Release of this information would have a substantial negative impact on the Company.

Five-Year Service Quality Improvement Plan Progress Report

Pursuant to Section 0.459 of the Commission's rules and Exemption 4 of FOIA, Wyandotte Telephone Company requests that the text and data extracted from its five-year service quality improvement plan progress report be withheld from public inspection because it contains competitively sensitive commercial and financial information that the Company maintains as confidential. Public availability of this information would have a substantial negative impact on the Company.

In accordance with Section 0.459 of the Commission's rules, the following information is provided in support of this request:

(1) Identification of the specific information for which confidential treatment is sought:

Attachment to Line 112 of FCC Form 481 – Five-Year Service Quality Improvement Plan Progress Report. Specifically, confidential treatment is sought for all information in the five-year plan progress report related to the Company's access line counts, existing broadband capabilities, and current and planned financial investments in its network that will improve service quality, service coverage, and/or service capacity for its customers.

(2) Identification of the Commission proceeding in which the information was submitted or a description of the circumstances giving rise to the submission:

The information was submitted in WC Docket No. 14-58 as an attachment to FCC Form 481- the Carrier Annual Reporting Data Collection Form. Section 100 of FCC Form 481 requires incumbent local exchange carriers receiving high cost support to attach a progress report on its five-year service quality improvement plan, pursuant to 47 C.F.R. §54.313(a)(1).

(3) Explanation of the degree to which the information is commercial or financial, or contains a trade secret or is privileged:

The five-year service quality improvement plan progress report contains granular information on the Company's access line counts and/or existing broadband capabilities as well as recent and planned capital investments in its network to improve service quality, service coverage, and/or service capacity. It also contains a

map of the Company's service area detailing progress toward meeting broadband deployment targets at the wire center level. This is closely guarded, privileged information that the Company does not make publicly available.

- (4) Explanation of the degree to which the information concerns a service that is subject to competition:

Broadband is subject to increasing competition in the areas served by rural, rate-of-return incumbent local exchange carriers (RLECs). Virtually all RLECs face competition from one or more wireless Internet service providers. Most RLECs also face competition from at least one other wireline broadband provider, such as a larger cable company, who will typically seek to "cherry pick" the lower cost portions of the study area. In addition, all RLECs face competition throughout their territories from satellite broadband providers.

- (5) Explanation of how disclosure of the information could result in substantial competitive harm:

Disclosure of the information contained in the five-year plan progress report would provide competitors with detailed, granular information regarding the Company's access line count, its existing broadband capabilities, and its recent and planned network investments that improve service quality, coverage, and/or capacity for subscribers. This would give competitors valuable confidential information with which to develop their own strategies for investing in the service area, thereby bringing substantial competitive harm to the Company.

- (6) Identification of any measures taken by the submitting party to prevent unauthorized disclosure:

The Company has continually treated the extracted information in its five-year plan progress report as confidential and carefully controls the information to protect it from competitors. Access to the information is limited to employees that require it and to non-employees with confidentiality obligations such as lenders, consultants, auditors, and attorneys. In addition, when such information is required to be submitted to a state regulatory authority it has been filed as confidential information, not available to the public.

MOSS-ADAMS_{LLP}

Ms. Marlene Dortch

Page 4

- (7) Identification of whether the information is available to the public and the extent of any previous disclosure of the information to third parties:

The redacted information in the five-year plan progress report is not available to the public, and third-party access is limited as described in (6) above.

- (8) Justification of the period during which the submitting party asserts that material should not be available for public disclosure:

The Company requests that the extracted information be withheld from public inspection indefinitely. The information in the five-year plan progress report details the Company's most recent network upgrades in relation to its previously submitted service quality improvement plan. It may also contain upcoming planned network improvements during the five-year period ending 2019. This information would provide a very useful baseline for competitors for several years beyond that period.

- (9) Any other information that the party seeking confidential information treatment believes may be useful in assessing whether its request for confidentiality should be granted:

Exemption 4 of FOIA shields from public disclosure commercial or financial information obtained from a person that is privileged or confidential. Based on the responses provided above, the information in question satisfies this test.

Financial Annual Report

Section 3005 of FCC Form 481 requires a privately-held rate-of-return carrier receiving high cost support to attach a full and complete annual report of the company's financial condition and operations pursuant to 47 C.F.R. §54.313(f)(2). Wyandotte Telephone Company seeks confidential treatment of its financial annual report pursuant to the March 22, 2016 *Protective Order* in WC Docket Nos. 10-90 and 14-58.¹ The *Protective Order* specifically covers information filed pursuant to 47 C.F.R. §54.313(f)(2).

Wyandotte Telephone Company is providing to the Office of the Secretary, under seal, this cover letter and the Form 481 filing which includes the confidential information that is being requested to be withheld from public inspection.

Each page of the five-year service quality improvement plan progress report confidential submission bears the legend, "CONFIDENTIAL – NOT FOR PUBLIC DISCLOSURE."

Each page of the financial annual report confidential submission bears the legend, "CONFIDENTIAL INFORMATION – SUBJECT TO PROTECTIVE ORDER BEFORE THE FEDERAL COMMUNICATIONS COMMISSION."

The confidential information has also been submitted to the Universal Service Administrative Company through its E-File system as attachments to the FCC Form 481.

In the filing submitted via ECFS, all pages containing confidential information bear the legend "REDACTED – FOR PUBLIC INSPECTION."

This cover letter includes no confidential information and the text is the same in both the non-redacted and redacted versions except for the confidentiality markings.

Wyandotte Telephone Company, dba TDS Telecom**State: OKLAHOMA****Study Area: 432034****54.313(a)(1) Progress Report on Five Year Service Quality Improvement Plan pursuant to § 54.202(a)**

As an Incumbent Local Exchange Carrier (ILEC) and Eligible Telecommunications Carrier (ETC), Wyandotte Telephone Company has been providing ubiquitous, high-quality voice telecommunications services in its study area for many years. To accomplish and maintain this service level, Wyandotte has made significant historical investment to deploy, operate, and maintain an integrated, highly-reliable network. In addition to its own capital spending, Wyandotte draws from the federal Universal Service Fund (USF). Universal service support has been (and continues to be) critical in enabling Wyandotte's services in its rural markets to be reasonably comparable in quality and price to services in more urban markets, as Congress mandated in the Telecommunications Act. Wyandotte draws USF support because the cost of providing voice and data services in its rural study area are substantially higher than those in urban areas, and thus all of the costs cannot be recovered solely from Wyandotte's customers while maintaining reasonably comparable prices. Wyandotte has made investments to bring high speed data services to its customers when the level of customer revenues and universal service support has made it financially viable to do so.

For Wyandotte, federal high cost support is used to help offset ongoing network costs, but the monies received cover only a portion of the cost of updating and operating the network. In 2015, Wyandotte received \$193,808 in USF support while incurring [REDACTED] in operating expenses and investing [REDACTED] in new plant. The attached Schedule A contains a list of specific network improvement projects that were completed in 2015 at the wire center level. Where these projects related to specific DSAs within the wire center, it is so indicated and can be cross-referenced to the exchange map attached as Exhibit 1. The attached Schedule B summarizes Wyandotte's actual expenses for 2015. As evidenced by these support and expenditure numbers provided for the current reporting year, the universal service support that Wyandotte receives covers only a fraction of its cost to provide service. Continued receipt of USF support is vital to helping Wyandotte maintain reasonably comparable rates for local exchange service; and to incrementally upgrade its telecommunications facilities and equipment to help meet evolving service requirements and maintain high quality service.

54.313(a)(1) Progress Report on Five Year Service Quality Improvement Plan pursuant to § 54.202(a)

The content, timing, and specific geographic locations of projects that will be undertaken in the next five years, will be determined based upon careful analysis of the dual pathways, model-based or rate of return, for determining universal service support. The selection of future projects will be based on the evaluation of many factors, including current consumer demand, limited capital resources and estimated amounts of universal service support available to Wyandotte under its selected path.

Regardless of the path ultimately selected, Wyandotte remains committed to utilizing available universal service support to help maintain and improve network quality, and where feasible, deploying advanced technologies and new services, expanding coverage and improving broadband speeds for its customers.

Line 510 – Description of Compliance with Service Quality Standards and Consumer Protection

Rule 54.313(a)(5)

TDS Telecommunications Corporation's ILEC companies follow applicable federal and state service quality and consumer protection rules. They comply with quality of service requirements including monitoring and reporting service quality metrics where required. TDS Telecom has implemented numerous consumer protection measures to protect customer information. For example, TDS implemented Customer Proprietary Network Information (CPNI) policies and procedures that are consistent with the FCC's regulations. Employees are required to complete CPNI training and in addition, employees who have access to CPNI data receive additional guidance through written procedures regarding customer authentication. Annually, all employees are required to review TDS' Business Code of Conduct which includes information and requirements on protecting sensitive customer information from improper use and disclosure. TDS data privacy and security policies are reinforced through periodic training required of all employees. Additional consumer protection measures include TDS' use of a third-party verifier to prevent unauthorized presubscribed interexchange carrier (PIC) changes ("Slamming") and the elimination of billing and collection arrangements that could have potentially allowed unauthorized third-party charges to be added to customer's bills ("Cramming").

LINE 610 - ABILITY TO FUNCTION IN EMERGENCY SITUATIONS

Company is able to remain functional in an emergency situation through the use of back-up power to ensure functionality without an external power source. The Company's standard for battery backup is 8 hours in offices with no generator and 4 hours in offices with a generator. This is ensured during semi-annual routine maintenance which includes battery inspection, cleaning, documentation of float voltage and cell temperature, as well as equalization or replacement if necessary. In addition, permanent generators are present at significant wire centers to maintain power in the event a commercial power failure extends beyond battery backup capabilities. Also, portable generators are available for deployment to remote wire centers without permanent generators. The Company's network is engineered to provide maximum capacity in order to handle excess traffic in the event of traffic spikes resulting from emergency situations. Company facilities are remotely monitored and managed by a centralized Network Operations Center which is staffed 24 x 7, 365 days a year. Technicians are able to remotely access and respond to alarm conditions. By design, transport redundancy is built into the telephony and data network on many levels and in the event of a hardware or circuit failure or traffic spike, the networks are able to self-correct in many cases or, at many locations, technicians are able to manually switch network elements to standby facilities both locally and remotely.

FCC - 54.313(a)(9)

Summary

Wyandotte serves a portion of the Wyandotte Tribe of Oklahoma in its exchange of Wyandotte, Oklahoma. TDS- Wyandotte reached out to the Wyandotte Tribe via letters dated May 29, 2015 and November 6, 2015 requesting to schedule a meeting with tribal representatives in fulfillment of its §54.313 (a)(9) tribal engagement obligation and in furtherance of the goal of establishing good working relationships with its customers located on tribal lands. A copy of these letters is attached. TDS- Wyandotte received no response to the letters from the Wyandotte Tribe and thus was unable complete a tribal engagement during 2015.

TDS- Wyandotte completed sale of the Wyandotte study area to Seneca Telephone Company in December 2015. Further outreach to the Wyandotte Tribe will be done by Seneca Telephone Company.

Dear Chief Friend,

TDS Telecom is a communications provider and eligible telecommunications carrier (ETC) in the Wyandotte exchange, which is located within the Tribal lands of the Wyandotte Nation. The FCC, in its Transformation Order released on November 18, 2011, required ETCs to annually engage Tribal governments to discuss, at a minimum, the following issues: (1) a needs assessment and deployment planning with a focus on Tribal community anchor institutions; (2) feasibility and sustainability planning; (3) marketing services in a culturally sensitive manner; (4) rights of way processes, land use permitting, facilities siting, environmental and cultural preservation review processes; and (5) compliance with Tribal business and licensing requirement.

I would like to schedule a meeting with Tribal representatives to discuss the issues listed above and any other concerns you may have regarding the telecommunications services being provided by TDS Telecom. Please provide a list of potential dates and times when the Tribal representatives would be available to meet. My business phone number is 865-671-4750; email jeff.handley@tdstelecom.com. LINE 1010 – VOICE SERVICES RATE COMPARABILITY

The Wireline Competition Bureau's 2015 reasonable comparability benchmark for voice services was \$47.48, which includes the federal subscriber line charge ("SLC").¹

In 2015, in all of the exchanges served by Wyandotte Telephone Company ("the Company"), the single-line residential local rate was \$19.65. When the federal SLC (\$6.50) is included, the rate was \$26.15. Therefore, the Company's pricing of fixed voice services in 2015 was less than the reasonable comparability benchmark of \$47.48.

LINE 1030 – BROADBAND SERVICES RATE COMPARABILITY

In 2015, Wyandotte Telephone Company charged a residential rate of \$69.20 for broadband providing 25 Mbps download, 5 Mbps upload, and a usage allowance of 250GB. This rate is lower than \$95.08, which is the 2015 reasonable comparability benchmark for the same offering established by the Wireline Competition Bureau.¹

Re: CC Docket No. 14-58
Certification of Reasonable Steps Taken to Provide 10 x 1 Broadband Service

Dear Ms. Dortch:

As part of the FCC's annual reporting requirements for ETC re-certification, Rule 54.313(f)(1)(i) requires carriers to certify that upon receiving a customer's reasonable request for broadband service with speeds of 10 mbps download and 1 mbps upload, the carrier took reasonable steps to provide service at those speeds.

TDS Telecommunications Corporation (TDS Telecom) owns and operates the telephone companies listed on the attachment. Each provides broadband service. Collectively through these companies, TDS Telecom offers broadband service to 94% of its ILEC customers. Most of these customers receive speeds of 5 mbps or faster.

In 2015, TDS Telecom completed a multi-year initiative to extend its broadband coverage to much of its rural serving area. This effort utilized grant funding available through the American Recovery and Reinvestment Act and was administered by the Rural Utility Services (RUS). \$100 million in grant funding was received while TDS Telecom invested an additional \$25 million of its own capital. At the conclusion of this initiative, broadband service was made available to an additional 32,000 customers who were previously unserved.

At this time, and with today's available technology, TDS Telecom has extended its broadband footprint as far as is economically feasible absent additional funding through universal service support and/or other state and federal grant programs. The 6% of customers that remain unserved live in our most rural and remote service areas. The cost to bring broadband to them, or to increase speeds to 10 x 1 for those who currently have service at slower speeds, would far exceed the revenue received from the sale of those services. We continue to closely monitor emerging technologies and look for affordable ways to serve these customers. As part of that effort, TDS Telecom is evaluating recent changes to the universal service program for rate of return carriers to determine how the funds available going forward can be utilized to efficiently extend broadband to additional customers in unserved areas and meet the evolving speed requirements for customers in underserved areas.

As Executive Vice President of TDS Telecommunications Corporation and an officer authorized to give this certification, I hereby certify that TDS Telecom collectively and through each of

its subsidiaries listed on the attachment, has taken reasonable steps to provide 10 x 1 broadband service upon receipt of a reasonable request from a customer.

Sincerely,
